

Services For Private Landowners

Wildlife Specialists, LLC

Wildlife Specialists, LLC, is experienced in habitat restoration and development and provides thorough and efficient assessments necessary for recovering disturbed land areas, as well as improving existing habitat.

Qualified Personnel: Our professional staff are qualified and trained to follow protocols established by the Pennsylvania Department of Conservation and Natural Resources, Pennsylvania Game Commission, and Pennsylvania Fish and Boat Commission.

Timely Response: Once a client submits a survey request, we provide thorough site assessments to determine the scope and timeline for a project. Upon completion of fieldwork, reports are produced and delivered to the client in a timely manner.

Comprehensive Reporting: Our reports contain all necessary information required to evaluate a project. Specifically, we provide detailed site descriptions, high quality maps and photographs. In addition, we offer recommendations on how clients can avoid or reduce their impact on sensitive plant and their habitats.

Post-Development Monitoring: We can provide long-term monitoring of sites to assess ecological responses to development activities.

Providing Habitat Restoration and Development for:

- Deer Management
- General Wildlife Attraction and Viewing
- Population Control and Management
- General Habitat Improvement: Seeding, Tree and Shrub Planting
- Species- Specific Habitat Design and Implementation
- Oil & Gas Well Sites and Pipelines
