

Wetland Delineation

Wildlife Specialists, LLC

Wildlife Specialists, LLC, is experienced in wetland delineation and provides thorough and efficient assessments necessary for sensitive habitat avoidance and environmental compliance.

Certified Delineators: Our professional staff are certified and trained to follow protocols established in the U.S. Army Corps of Engineers' 1987 Wetland Delineation Manual.

Timely Response: Once a client submits a survey request, sites are assessed and existing wetlands are delineated thoroughly to determine the impact of a project. Upon completion of fieldwork, comprehensive reports are produced and delivered to the client in a timely manner to avoid costly delays in the permitting process.

Comprehensive Reporting: Our reports contain all necessary information required by the regulatory agencies to evaluate a project. Specifically, we provide detailed site descriptions, high quality maps, photographs, and all data collected at each site. In addition, we offer recommendations on how clients can avoid or reduce their impact on wetlands.

Post-Development Monitoring: Where necessary, we provide long-term monitoring of sites to assess ecological responses to wetland mitigation.

Providing Wetland Services for:

- Wind Energy Development
- Utility Rights of Way
- Oil & Gas Well Sites and Pipelines
- Coal Mining
- Transportation
- Private Landowners
- Land Development Projects
