

Allegheny Woodrat Surveys

Wildlife Specialists, LLC

Wildlife Specialists, LLC, has extensive experience with Allegheny Woodrat surveys. Our staff are recognized experts and qualified to provide a wide variety of services related to Allegheny Woodrat management.

Services Include:

- **Habitat Assessments:** Our staff are qualified to identify sites within project areas that are likely to support Allegheny Woodrat populations. These areas are often associated with rocky cliffs, boulder piles, and talus slopes.
- **Surveys for Woodrat Sign and Activity Centers:** If Allegheny Woodrat habitat is located, our staff are qualified to survey the area for woodrat sign and activity centers such as food caches, latrines, and den sites.
- **Live-Trapping Surveys:** Our staff are experienced in conducting live-trapping surveys to determine the presence of woodrats on the project site and to estimate local population numbers.
- **Habitat Mitigation/Enhancement:** Our staff is experienced in both design and implementation of the Allegheny woodrat habitat mitigation/enhancement plans.
- **Agency Negotiation and Communication:** The Pennsylvania Game Commission (PGC) recognizes our staff as experts in all aspects of woodrat biology and management.
- **Comprehensive Reporting:** Our reports contain all necessary information required by the regulatory agencies to evaluate a project. Specifically, we provide detailed site descriptions, high quality maps, photographs, and all required data collected at each site.

Providing Services for:

- Wind Energy Development
- Utility Rights of Way
- Oil & Gas Well Sites and Pipelines
- Mining
- Transportation
- Private Landowners
- Land Development Projects
